Trustees' Report

Introduction

The Trustees present the annual report on the operation of The Law Society of Ireland Pension and Life Assurance Scheme (the "Scheme") for the year ended 31 December 2020. The content of this report conforms to the Occupational Pension Schemes (Disclosure of Information) Regulations 2006 (as amended) prescribed by the Minister for Social Protection under the Pensions Act 1990. The report outlines the constitution and structure of the Scheme together with details of financial developments for the year, investment matters and membership movements.

Queries in relation to Scheme benefits or related matters should be addressed, in the first instance to the Director of Human Resources, Law Society of Ireland, Blackhall Place, Dublin 7.

The Scheme

The Scheme, which operates on a defined benefit basis, was established to provide retirement and life assurance benefits for its members and is a distinct legal entity, separate in every respect from the principal employer, the Law Society of Ireland, Blackhall Place, Dublin 7. Membership is open to eligible employees of the principal employer.

In compliance with Financial Services & Pensions Ombudsman Regulations Act 2017, a procedure has been put in place to facilitate Internal Dispute Resolution. Details of this procedure have been set out in the explanatory booklet which has been made available and distributed to members.

The Scheme is governed by the Trust Deed & Rules; members are entitled to inspect these documents or, on payment of a small charge, receive a copy of them. Details of members' benefits are also provided in the explanatory booklet which has been distributed to all members and individual details appear on each member's benefit statement. There have been no changes during the year to the Scheme information specified in Schedule C of the Occupational Pension Schemes (Disclosure of Information) Regulations 2006 (as amended).

The Scheme has been approved by the Revenue Commissioners as an "exempt approved scheme" under Section 774 of the Taxes Consolidation Act 1997 and as such its assets are generally allowed to accumulate free of income and capital gains taxes. In addition, tax relief is given on employer and member contributions to the Scheme and certain lump sum payments to members can be paid free of tax.

The Scheme has also been registered with The Pensions Authority and its registration number is 3399.

The Scheme is financed by contributions from the employer and members. Details of contributions and other financial developments during the year are set out herein.

Impact of Covid-19

In early 2020, Covid-19, an illness caused by a new coronavirus, impacted a significant number of countries globally. Covid-19 has caused disruption to economic activity which has been reflected in recent fluctuations in global stock markets. Optimism over a number of potential vaccines to combat the coronavirus helped spur on markets over the final quarter of 2020. During the year the Trustees have worked with their advisors to ensure there was no disruption to the Scheme as a result of Covid-19.

The financial statements have been prepared on the going concern basis. In making this assessment, the Trustees have assessed the ability of the Scheme to meet its future obligations to pay member benefits as they fall due. The Trustees believe that the Scheme remains well positioned to manage its risks successfully and expects that the Scheme will continue in operational existence for the foreseeable future.

The Trustees

Stewardship of Scheme assets is in the hands of its Trustees. The right of members to select, or approve the selection of, trustees is set out in the Occupational Pension Schemes (Member Participation in the selection of Persons for Appointment as Trustees) (No. 3) Regulations 1996.

The Trustees and the Scheme administrator have access at all times to:

- (1) Trustees' Handbook produced by The Pensions Authority; and
- (2) Guidance Notes issued by The Pensions Authority from time to time.

Section 59AA of the Pensions Act 1990, which requires trustees of pension schemes to undergo training, was brought into force on 1 February 2010 by virtue of the Social Welfare and Pensions Act 2008 (Section 28) (Commencement) Order 2009. The Trustees have adhered to their training obligations as required by the Pensions Act within the time limits set out therein.

The Trustees have access to appropriate training on their duties and responsibilities, however, no costs or expenses were incurred by the Scheme in respect of Trustee training during the year.

Management of the Scheme

The Trustees of the Scheme as at the date of signing are detailed on page 7.

Unless otherwise indicated the Trustees served for the entire period and are still serving at the date of approval of the Annual Report.

Additional advisors to the Scheme are also outlined on page 8.

Condition of the Scheme

The financial condition of the Scheme is dealt with in the Financial Developments, Actuarial Position and Investment Management sections of this report.

Statement of Risks

Under the Occupational Pension Schemes (Disclosure of Information) Regulations 2006 (as amended), the Trustees are required to describe the risks associated with the Scheme and disclose these to members. A Statement of Risks adopted by the Trustees is included in the Appendices to this report.

The Scheme is funded by contributions from the employer and members. Actuarial advice will have been obtained when setting those contributions. However, there is no guarantee that the Scheme will have sufficient funds to pay the benefits promised. It is therefore possible that the benefits payable under the Scheme may have to be reduced. If the Scheme is wound up and there is a deficit, the employer may not be under an obligation to fund the deficit or, even if the employer is under such an obligation, they may not be in a position to fund the deficit.

Financial Developments

The value of the Scheme's net assets increased from €44,711,166 at the start of the year to €48,094,803 at the year end. This increase was accounted for by the net returns on the Scheme's investments of €2,636,604 combined with the additions from dealings with members of €747,033.

Benefits and payments to leavers amounted to €1,081,989 and premiums in respect of insured benefits amounted to €132,481.

Contributions

Contributions for the year amounted to €1,961,930. Contributions were paid in accordance with the rules of the Scheme and the recommendations of the Actuary and were received in full within 30 days of the year end.

The Trustees are satisfied that appropriate procedures have been put in place to ensure that contributions payable are received in accordance with the legislative requirements as set out under Section 58A of the Pensions Act 1990. This legislation sets out the following requirements:

- Member contributions must be received within 21 days from the end of the month in which they were deducted from pay.
- Employer contributions must be received in accordance with the timings noted by the Actuary and stated in the Trust Deed and Rules and otherwise within 30 days of the end of the Scheme year.

The above details have been extracted from the financial statements of the Scheme which form part of this report.

Membership Movements

	Active Members	Life Insurance Only Members	Pensioners	Deferred Pensioners
At 1 January 2020	146	84	30	69
New members during the year	13	20	2	3
Leavers during the year	(5)	(27)	-	-
	<hr/>	<hr/>	<hr/>	<hr/>
At 31 December 2020	154	77	32	72
	<hr/> <hr/>	<hr/> <hr/>	<hr/> <hr/>	<hr/> <hr/>

Pensions

The Scheme does not provide for automatic increases to pensions in the course of payment. There is, however, a power which enables the Trustees to review pensions in payment and to recommend discretionary increases to the principal employer for its approval. Increases of 0.8% were awarded during the year.

The statutory element of deferred pensions is revalued annually in accordance with the Pensions Act 1990 (as amended), generally at the lower of 4% and the rate of change in the Consumer Price Index (CPI). The rate declared in the year under review was -0.3%.

There are no pensions or pension increases being paid by or at the request of the Trustees for which the Scheme would not have a liability in the event of winding up.

Actuarial Position

Ongoing funding position

The development of the Scheme is monitored by the Scheme Actuary by means of an actuarial valuation which is carried out every three years. The most recent valuation was carried out as at 31 December 2018. Based on that valuation the Actuary recommended the future contribution rate to be paid by the employer such that, if the valuation projections reflected the actual experience, the recommended rate would suffice to meet the future benefit payments from the Scheme as they fall due. The employer is contributing at the recommended rate. The next valuation is due to be carried out as at 31 December 2021.

Discontinuance funding position

Section 44 of the Pensions Act 1990 (the Act) sets out a funding standard test which is a measure of the minimum liabilities if the Scheme discontinued. If assets are insufficient to meet liabilities on this statutory minimum level, the Trustees and company must take action to restore the funding level. The actual liabilities on discontinuance may be substantially higher than this statutory minimum level. An Actuarial Funding Certificate (AFC) stating that the Scheme met this statutory minimum test was prepared by the Actuary with an effective date of 31 December 2018 is included as one of the Appendices to this report.

The funding standard test also includes additional reserves. A copy of the Funding Standard Reserve Certificate is also included in the Appendices confirming that the Scheme met the Funding Standard Reserve at 31 December 2018.

The Act requires a statement from the Scheme Actuary concerning the funding standard and funding standard reserve position of the Scheme as at the year end. A copy of this statement in which the Actuary confirms that the Scheme met both of the statutory tests at 31 December 2020 is included as one of the Appendices to this report.

In line with guidelines set out in the Statement of Recommended Practice, Financial Reports of Pension Schemes (Revised 2018) ("SORP"), there is an additional requirement to include a Report on Actuarial Liabilities alongside the financial statements of the Scheme, and this report is also included in the Appendices.

Investment Management

It is the policy of the Trustees to delegate the management of the Scheme's assets to professional investment managers, currently Irish Life Investment Managers Limited, Standard Life Investments Limited, and Invesco Asset Management Limited. Additional voluntary contributions (AVCs) are invested separately with New Ireland Life Assurance Company plc.

The Trustees set the investment strategy for the Scheme taking into account considerations such as long term liabilities and the funding agreed with the employer. The investment strategy is set out in its Statement of Investment Policy Principles as are the investment objectives, investment risk measurement methods, risk management processes to be used and the strategic asset allocation. A Statement of Investment Policy Principles adopted by the Trustees is included as one of the Appendices to this report.

The managers have, within specified mandates, total discretion in the investment of Scheme assets and provide detailed reports to the Trustees on the strategy adopted and on the performance of the monies invested. A commentary by each of the managers on the performance achieved during the year is included as one of the Appendices to this report.

Financial Reporting Standard 102 ("FRS 102") requires the disclosure of the nature and extent of credit and market risks the investments are subject to and the risk management practices in place to manage these. These details are included in the Investment Risks note to the financial statements included with this report.

The managers are remunerated on a fee basis calculated as a percentage of the assets under management and these fees are reflected in unit prices and borne by the Scheme. Fees in relation to AVC investments with New Ireland Life Assurance Company plc are charged directly and deducted from the funds.

Employer Related Investments

There were no employer related investments at any time during the year.

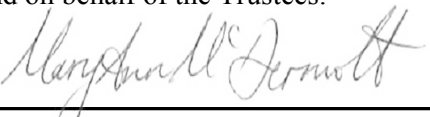

Subsequent Events

Subsequent to the year end, other than the ongoing Covid-19 pandemic, there have been no significant events that would require amendment to or disclosure in the Annual Report.

In Conclusion

We trust that members find this report informative and we are pleased to acknowledge the assistance received from the principal employer and its staff during the year as well as from our various professional advisers.

Financial Statements

Statement of Trustees' Responsibilities

The financial statements are the responsibility of the Trustees. Irish pension legislation requires the Trustees to make available for each Scheme year the annual report of the Scheme, including audited financial statements and the report of the auditor. The financial statements are required to show a true and fair view, in accordance with Financial Reporting Standard 102 - the Financial Reporting Standard applicable in the UK and the Republic of Ireland, of the financial transactions for the Scheme year and the amount and disposition of the assets and liabilities (other than liabilities to pay benefits in the future) at the end of the Scheme year and include a statement as to whether the financial statements have been prepared in accordance with Statement of Recommended Practice, Financial Reports of Pension Schemes (Revised 2018) ("SORP"), subject to any material departures disclosed and explained in the financial statements.

Accordingly, the Trustees must ensure that they have supervised the preparation of the Scheme financial statements and ensure that:

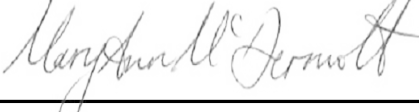

- suitable accounting policies are selected and then applied consistently;
- reasonable and prudent judgements and estimates are made;
- the financial statements are prepared on a going concern basis unless it is inappropriate to presume that the Scheme will not be wound up; and
- the SORP is followed, or particulars of any material departures are disclosed and explained.

The Trustees are required by law to have appropriate procedures in place throughout the year under review, to ensure that:

- contributions payable during the Scheme year are received by the Trustees in accordance with the timetable set out in section 58A of the Pensions Act 1990 where applicable to the contributions and otherwise within 30 days of the end of the Scheme year; and
- contributions payable are paid in accordance with the rules of the Scheme.

The Trustees are responsible for making available certain other information about the Scheme in the form of an annual report. The Trustees are also responsible for ensuring that proper membership and financial records are kept on a timely basis sufficient to enable an Annual Report to be prepared for the Scheme containing the information specified in Regulation 7 of the Occupational Pension Schemes (Disclosure of Information) Regulations 2006 (as amended), including financial statements which show a true and fair view of the financial transactions of the Scheme in the year under review and of the assets and liabilities at the year end, other than liabilities for pensions and other benefits payable after the year end. They are also responsible for safeguarding the assets of the Scheme and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities, including the maintenance of an appropriate system of internal controls.

Independent Auditor's Report to the Trustee of The Law Society of Ireland Pension and Life Assurance Scheme

Report on the audit of the financial statements

Opinion

We have audited the financial statements of The Law Society of Ireland Pension and Life Assurance Scheme ("the Scheme") for the financial year ended 31 December 2020, which comprise the Fund Account, Statement of Net Assets and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law, and FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland'.

In our opinion the financial statements:

- Give a true and fair view of the financial transactions during the Scheme year and of the amount and disposition of the assets and liabilities (other than liabilities to pay pensions and other benefits in the future) at the end of the Scheme year; and
- Contain the information specified in Schedule A to the Occupational Pension Schemes (Disclosure of Information) Regulations 2006, including a statement whether the financial statements have been prepared in accordance with the Statement of Recommended Practice, Financial Reports of Pension Schemes (revised in November 2014) and FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland', subject to any material departures disclosed and explained in the financial statements.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described below. We are independent of the Scheme in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard for Auditors (Ireland) issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Trustee is responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Independent Auditor's Report to The Law Society of Ireland Pension and Life Assurance Scheme - continued

Opinions on other matters prescribed by the Occupational Pension Scheme (Disclosure of Information) Regulations 2006

Based solely on the work undertaken in the course of the audit, we report that in our opinion:

- all contributions payable to the Scheme during the year ended 31 December 2020 were received within 21 days; and
- all contributions receivable at the Scheme year-end date were received within 30 days.

Respective responsibilities

Responsibilities of trustees for the financial statements

As explained more fully in the Trustees' Responsibilities Statement, the Trustee is responsible for the preparation of the financial statements and for being satisfied that the financial statements give a true and fair view, and for such internal control as the Trustee determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditor's report.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Scheme's Trustee, as a body, in accordance with the Pensions Act 1990 and the regulations made thereunder. Our audit work has been undertaken so that we might state to the Scheme's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Scheme's Trustee, for our audit work, for this report, or for the opinions we have formed.

The notes on pages 15 to 29 form part of the financial statements.

The financial statements summarise the transactions of the Scheme and deal with the net assets at the disposal of the Trustees. They do not take account of obligations to pay pensions and benefits which fall due after the end of the Scheme year. The actuarial position of the Scheme, which does take account of such obligations, is dealt with in the Trustees' Report and in the actuarial certificates, actuary's statement and report on actuarial liabilities included in the annual report and these financial statements should be read in conjunction with them.

Notes to the financial statements

Basis of Preparation

The financial statements have been prepared in accordance with The Occupational Pension Schemes (Disclosure of Information) Regulations 2006 (as amended), Financial Reporting Standard 102 - the Financial Reporting Standard applicable in the UK and Republic of Ireland ("FRS 102") issued by the Financial Reporting Council and in line with the guidelines set out in the Statement of Recommended Practice, Financial Reports of Pension Schemes (Revised 2018) ("SORP").

Impact of Covid-19

In early 2020, Covid-19, an illness caused by a new coronavirus, impacted a significant number of countries globally. Covid-19 has caused disruption to economic activity which has been reflected in recent fluctuations in global stock markets. Optimism over a number of potential vaccines to combat the coronavirus helped spur on markets over the final quarter of 2020. During the year the Trustees have worked with their advisors to ensure there was no disruption to the Scheme as a result of Covid-19.

The financial statements have been prepared on the going concern basis. In making this assessment, the Trustees have assessed the ability of the Scheme to meet its future obligations to pay member benefits as they fall due. The Trustees believe that the Scheme remains well positioned to manage its risks successfully and expects that the Scheme will continue in operational existence for the foreseeable future.

1. Accounting policies

The significant accounting policies adopted by the Trustees which have been applied consistently in dealing with items which are considered material in relation to the Scheme's financial statements are as follows:

A. Investments:

Investments are included at fair value. Where separate bid and offer prices are available the bid price is used for investment assets. Otherwise the closing single price, single dealing price, net asset value (NAV) or most recent transaction price is used.

Unitised pooled investment vehicles which are not traded on an active market but where the manager is able to demonstrate that they are priced daily, weekly or at each month end, and are actually traded on substantially all pricing days are included at the last price provided by the manager at or before the year end.

B. Investment Income:

Investment income and interest on bank deposits is accounted for on the accruals basis. Income earned on investments in unit linked funds is not distributed but is accumulated within the capital of the funds.

C. Investment Management Fees:

Investment management fees are calculated as a percentage of the assets under management and these fees are borne by the Scheme. Fees relating to unit funds are not levied directly but are reflected in unit prices and also borne by the Scheme.

Notes to the financial statements

1. Accounting policies (continued)

D. Contributions:

Normal contributions, both from the members and from the employer, are accounted for on an accruals basis in the month member contributions are deducted from the payroll. Employer augmentation contributions are accounted for in accordance with the agreement under which they are paid, or in the absence of such an agreement, when received. Additional voluntary contributions from the members are accounted for, on an accruals basis, in the month deducted from the payroll.

E. Payments to members:

Benefits are accounted for in the period in which they fall due. Where there is a choice, benefits are accounted for in the period in which the member notifies the Trustees of their decision on the type or amount of benefit to be taken or if there is no member choice, on the date of retirement or leaving.

Where the Trustees are required to settle tax liabilities on behalf of a member (such as when lifetime or annual allowances are exceeded) with a consequent reduction in that member's benefits receivable from the Scheme, this is shown separately within benefits.

F. Additional Voluntary Contributions:

In addition to their normal contributions under the Scheme, members may make additional voluntary contributions to acquire further benefits on a money purchase basis. In line with the SORP (Revised 2018) AVC assets are now included in the Net Assets of the Scheme and are included in the Statement of Net Assets available for benefits on page 14.

G. Transfers to and from other Schemes:

Transfer values represent the amounts receivable and payable during the year for members who have either joined or left the Scheme. All the values are based on methods and assumptions determined by the Actuary advising the Trustees. The values are accounted for upon liability being accepted by the receiving Scheme.

H. Foreign currencies:

The functional and presentational currency of the Scheme is the Euro.

I. Expenses:

All administrative expenses are borne directly by the employer.

2. Taxation

The Scheme has been approved as an "exempt approved scheme" for the purposes of Section 774 of the Taxes Consolidation Act 1997 and thus Scheme income and gains are generally exempt from taxation.

Notes to the financial statements

3. Constitution of the Scheme

The Scheme was established as a Defined Benefit Scheme with effect from 11 April 1973 under a Definitive Trust dated 19 December 1997.

The Scheme is established as a trust under Irish law and has been registered with the Pensions Authority. The address for enquiries to the Scheme is included in the Trustees' Report.

4. Benefits

Pension benefits under the Scheme are provided for by direct investment. The death in service benefits are secured by policies underwritten by the insurer to the Scheme.

5. Actuarial valuation

The development of the Scheme is monitored by the Scheme Actuary by means of an actuarial valuation which is carried out every three years. The most recent valuation was carried out as at 31 December 2018. Based on that valuation the Actuary recommended the future contribution rate to be paid by the employer such that, if the valuation projections reflected the actual experience, the recommended rate would suffice to meet the future benefit payments from the Scheme as they fall due. The employer is contributing at the recommended rate. The next valuation is due to be carried out as at 31 December 2021.

13. Investments

Reconciliation of investments held at beginning and end of year:

	Value at 01/01/2020	Purchases	Sales proceeds	Change in market value	Value at 31/12/2020
	€	€	€	€	€
Pooled investment vehicles	42,376,553	1,045,646	-	2,531,562	45,953,761
AVC investments	2,256,516	565,918	(873,482)	95,643	2,044,595
	<u>44,633,069</u>	<u>1,611,564</u>	<u>(873,482)</u>	<u>2,627,205</u>	<u>47,998,356</u>
Total net investment assets	<u>44,633,069</u>	<u>1,611,564</u>	<u>(873,482)</u>	<u>2,627,205</u>	<u>47,998,356</u>

The change in market value of investments during the year comprises all increases and decreases in the market value of investments held at any time during the year, including profits and losses realised on sales of investments during the year.

Direct transaction costs such as fees, commissions and stamp duty, are included in the cost of purchases and sale proceeds.

Indirect costs are incurred through bid-offer spread on investments within pooled investment vehicles. The amounts of indirect transaction costs are not separately provided to the Scheme.

Notes to the financial statements

13. Investments (continued)

Investments as at 31 December 2020 are detailed below:

	€	% of net assets 2020	€	% of net assets 2019
Pooled Investment Vehicles				
Irish Life Investment Managers				
LSI Balanced	39,278,776	82	35,725,668	80
Pension Consensus Fund	231,751	-	221,790	-
Standard Life Investment Manager				
Absolute Return Global Bond Strategies Fund (SICAV)	3,152,169	7	3,072,112	7
Invesco Asset Management Limited				
Invesco Global Targeted Returns Fund	3,291,065	7	3,356,983	8
AVC investments

Fair Value

In line with the guidelines set out in the SORP and FRS 102, for all financial instruments held at fair value, it is required to disclose, for each class of assets, an analysis of the level of fair value hierarchy. A fair value measurement is categorised on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

The fair value of investments has been determined using the following hierarchy:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The Scheme's investment assets and liabilities have been included at fair value:

Fair Value Current Year	Level 1	Level 2	Level 3	2020
	€	€	€	€
Pooled Investment Vehicles	-	45,953,761	-	45,953,761
AVC investments	-	2,044,595	-	2,044,595

Introduction

FRS 102 requires the disclosure of information in relation to certain investment risks. These are set out under FRS 102 as follows:

- **Credit risk:** the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.
- **Market risk:** comprises currency risk, interest rate risk and other price risk.
 - **Currency risk:** the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in foreign exchange rates.
 - **Interest rate risk:** the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market interest rates.
 - **Other price risk:** the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market prices, whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Investment Objectives

The overall investment objective of the Trustees is to ensure that the benefits of the Scheme continue to be affordable and that ultimately the level of benefits set out in the Trust Deed and Rules are secured.

Investment Policy

The Trustees have established a Statement of Investment Principles (SIPP) which sets out the investment strategy and policies for the scheme, the investment objectives, asset allocations as well as the procedures for managing and monitoring investments and the related risks. The Trustees have determined an investment strategy after receiving advice from their investment consultants. Implementation of the investment strategy has been delegated to professional investment managers. The investment strategy and implementation arrangements of the Scheme are reviewed regularly by the Trustees.

Risk measurement

The Scheme is exposed to credit risk and market risk (which includes currency risk, interest rate risk, and other price risk) arising from the financial instruments it holds. The Trustees will manage a range of investment risks in order to create a prudent, diversified and efficient portfolio. The Trustees recognise the importance of measuring the risk of the chosen investment policy by reference to the liabilities. Risk is measured by considering the following risk factors:

- The potential deterioration of the financial position of the Scheme;
- The risk of not achieving a sufficient level of investment return to match the growth in liabilities; and
- The intentions of the Sponsor.

Risk Management Processes

The Trustees measure and monitor risk in their portfolio on a regular basis. They do this by ensuring effective reporting of portfolio and liability information, which is considered as part of trustee meetings.

Notes to the financial statements

13. Investments (continued)

Strategic Asset Allocation

The split between growth and risk-reducing assets is determined to best reflect the funding and risk tolerances of both the Sponsor and the Trustees, while also taking market conditions into account. It also involves ongoing consideration of:

- How the risk-reducing portfolio might best be constructed in order to reflect the nature of the liabilities and
- How the growth portfolio might best be most efficiently constructed to seek to deliver return.

The current investment strategy is outlined below.

Asset Class	Strategic Allocation	Benchmark Index
<u>Growth Portfolio</u>		
Global Equities	18.6%	FTSE World Index (100% Hedged)
Emerging Market Equities	5.4%	MSCI Emerging Market Equity Index
Minimum Volatility Equities	3.0%	MSCI World Minimum Volatility Index

French 2047 Inflation Linked Bonds	9.0%	Customised to the term of the liabilities
Total Risk Reducing Portfolio	40.0%	Composite
Total Portfolio	100.0%	Composite

Implementation arrangements

The arrangements through which the investments of the Scheme are managed are described below.

Pooled Vehicles

Direct credit risk arising from pooled investment vehicles is mitigated by the underlying assets of the pooled arrangements being ring-fenced from the pooled manager, the regulatory environments in which the pooled managers operate and diversification of investments amongst a number of pooled arrangements. Certain investments are invested in unit-linked insurance contracts which are not entirely ring fenced from the manager, however managers which are life insurance companies are required to comply with the statutory solvency requirements of Irish insurance companies.

The Trustee regularly monitors the appointed investment managers, and carries out due diligence checks on the appointment of new pooled investment managers and on an ongoing basis monitors any changes to the regulatory and operating environment of the pooled managers.

A summary of pooled investment vehicles by type of arrangement, as provided by the investment managers, is as follows:

	2020	2019
	€	€
UCITS	6,443,234	6,429,095
Unit linked insurance contracts	41,555,122	38,158,096
	<u>47,998,356</u>	<u>44,587,191</u>

Risk disclosure under FRS 102

The investment strategy of the Scheme is implemented using a range of authorised pooled investment vehicles, including some which are written as life assurance policies. An element of counterparty credit risk is therefore inherent in the fund structure employed. However, the investment managers are obliged to comply with regulatory requirements applicable to the asset management sector. In addition, the life assurance companies are required to comply with regulatory requirements applicable to the insurance sector.

The risk is managed by investing with managers which are appropriately regulated and audited. This risk is monitored by the Trustees, on an ongoing basis by way of review of the investment manager performance and the regulatory environment in which these managers operate. Further, Irish Life and Standard Life are required to comply with the Solvency requirements of Life Assurance companies.

The funds used to implement the investment strategy above are exposed to indirect credit and market risks and, as required under FRS 102, these risks are tabulated below.

Notes to the financial statements

Investment risk can be considered in a number of different ways and so there must be an element of subjectivity involved in the interpretation of the risks listed under FRS102 and in the assessment of their impact above.

It should be noted that the risks above are not independent; no asset class is risk free and combinations of the above risks (and others) can influence any asset as market conditions vary. The Trustees consider investment risk holistically by regularly reviewing their investment strategy in the context of the evolution of the liabilities.

It should be noted that defined benefit pension scheme liabilities are valued with reference to interest rates. Consequently, the Scheme tries to mitigate the interest rate risk relative to its liabilities by holding appropriately dated, high quality bond assets in its risk-reducing portfolio which is constructed to reflect the specific liability profile of the Scheme.

The value of assets held in each asset class/fund above is outlined on pages 20 to 22 of the Annual Report.

Notes to the financial statements

14. Investment management expenses

	2020 €	2019 €
Investment manager expenses other fees	13,371	14,186

15. Current assets

	2020 €	2019 €
Contributions due from employer in respect of		
- Employer contributions	104,876	88,489
- Additional voluntary contributions	35,128	30,504
- Member contributions	39,957	35,392
Cash balance	151,902	151,902
Risk contribution due	16,084	-
Death Benefits due	-	168,939
Other debtors	-	427
	<u>347,947</u>	<u>475,653</u>

16. Current liabilities

	2020 €	2019 €
Retirement benefits payable	52,802	52,802
Transfers out payable	36,797	34,454
Death Benefit Payable	98,512	267,451
Pensions payable	47,305	42,849
Risk premium due	16,084	-
	<u>251,500</u>	<u>397,556</u>

17. Contingent liabilities

As stated on page 14 of these financial statements, liabilities to pay pensions and other benefits in the future have not been taken into account. On that basis, in the opinion of the Trustees, the Scheme had no contingent liabilities at the year end.

Notes to the financial statements

18. Related party transactions

- A The Trustees: The Trustees of the Scheme are detailed on page 7 of the report. During the year, two of the Trustees, Mary Ann Mc Dermott and Rory O'Neill were members of the Scheme. Their contributions are made in accordance with the Trust Deed & Rules and the Actuary's recommendations.
- B Remuneration of the Trustees: The Trustees did not receive any remuneration during the year or are not due any remuneration from the Scheme in connection with the management of the Scheme.
- C Principal Employer: The Law Society of Ireland is the principal employer. The employer contributions to the Scheme are made in accordance with the Trust Deed and Actuary's recommendations.
- D The Registered Administrator: Mercer (Ireland) Limited is the registered administrator. The registered administrator did not receive any and is not due any remuneration from the fund, in connection with the administration of the Scheme. Fees payable to the registered administrator in respect of administration, consultancy, actuarial and accounting work for the year are borne the principal employer. The Scheme Actuary is an employee of Mercer (Ireland) Limited. The cash held by the registered administrator at the year end on behalf of the Scheme was €151,902 (2019: €151,902).
- E The Investment Managers: Irish Life Investment Managers Limited, Standard Life Investments Limited and Invesco Asset Management Limited were appointed by the Trustees to manage the Scheme's assets. Additional Voluntary Contributions are invested in a separate policy with New Ireland Life Assurance Company plc. The Investment Managers are remunerated on a fee basis calculated as a percentage of the assets under management. These fees are reflected in unit prices and borne by the Scheme. Fees in relation to AVC investments with New Ireland Life Assurance Company plc are charged directly and deducted from the funds.

19. Employer Related Investments

There were no employer related investments at any time during the year.

20. Subsequent events

Subsequent to the year end, other than the ongoing Covid-19 pandemic, there have been no significant events that would require amendment to or disclosure in the financial statements.

21. Approval of the financial statements

The financial statements were approved by the Trustees on Monday 13 September 2021

Appendices

Statement of Risks

Statement concerning the condition of the Scheme, in particular concerning the financial, technical and other risks associated with the Scheme and their distribution.

Under law, the Trustees are required to describe the condition of the Scheme and the risks associated with the Scheme and disclose these to members.

In a "defined benefit" Scheme the main risk is that there will be a shortfall in the assets (for whatever reason) and the employer will not be willing or able to pay the necessary contributions to make up the shortfall. If that occurs, members may not get their anticipated benefit entitlements.

Some of the reasons why a shortfall could arise are as follows (this list may not be exhaustive):

- The assets may grow more slowly than expected, or even fall in value, depending on the performance of underlying markets and the securities chosen.
- Similarly, the liabilities may grow faster than expected due to higher salary or pension increases, or due to unfavourable movements in interest rates, or due to mortality and other elements of the Scheme's experience varying from the assumptions made.
- The administration of the Scheme may fail to meet acceptable standards. The Scheme could fall out of statutory compliance or the fund could fall victim to fraud or negligence. The benefits communicated to members could differ from the liabilities valued by the actuary.

If the Scheme were to wind up and the assets were insufficient to meet benefits due, the law specifies that members' additional voluntary contributions (AVCs), and then pensioners, have first call on the Scheme's assets before benefits can be paid to those who have yet to reach normal retirement age.

The priority order governing the wind up of a defined benefit scheme signed on the 25 December 2013 states that where there is a scheme deficit and a solvent employer, pensioners will no longer receive full priority up front on wind up but will continue to receive priority over active and deferred members in respect of their benefits (excluding post-retirement pension increases) in accordance with the following limits:

- 100% of the pension if the annual pension is €12,000 or less
- the greater of €12,000 or 90% of the pension where the annual pension is between €12,000 and €60,000
- the greater of €54,000 or 80% of the pension if the annual pension is €60,000 or more

Any remaining scheme assets would then be used to secure 50% of active and deferred members' benefits (excluding post-retirement pension increases) before any further distribution can be made to "top up" pensioners' benefits to 100%.

Apart from the potential for regulatory or legislative change, which is outside the control of the Trustees, the Trustees are satisfied that they are taking all reasonable steps to protect the members from the effects of these risks, including:

- Professional investment managers have been appointed to manage the Scheme's investments, the Scheme holds a range of diversified assets and there is regular monitoring of how these investments are performing.
- An actuarial valuation of the Scheme is carried out at least every three years to assess the financial condition of the Scheme and determine the rate of contributions likely to be required to meet the future liabilities of the Scheme. In addition, an annual review of the solvency position is carried out of the Scheme on the assumption that it is wound up. If the Scheme is found to be insolvent, the Trustees and the employer are required to complete a funding proposal for submission to the Pensions Authority with the objective of returning the Scheme to solvency.

Statement of Risks

- The Trustees have access to experienced professional advisers and administrators to assist with the proper running of the Scheme.

However, it is not possible to guard against every eventuality. For example, the employer may cease to trade, go into liquidation or may for other reasons decide to cease its liability to contribute to the Scheme. In this event, the fund may be wound up, future accrual of benefits may cease and accrued entitlements would be discharged from the available assets (which may or may not be sufficient to discharge member benefit expectations, as outlined above).

Also, it is necessary to take some investment risk and other risks in order to manage the affordability of the Scheme benefits and the capacity of the employer to meet this commitment.

The Law Society of Ireland Pension and Life Assurance Scheme

Statement of Investment Policy Principles

Introduction

The purpose of this Statement of Investment Policy Principles (the “Statement”) is to document the policies and guidelines that govern the management of the Scheme’s assets. It has been reviewed and adopted by the Trustees; it outlines the responsibilities, objectives, policies and risk management processes in order that:

- (a) There is a clear understanding on the part of the Trustees, relevant Company staff, consultants and others as to the objectives and policies of the Trustees;
- (b) There are clear principles governing the guidelines and restrictions to be presented to the investment managers regarding their investment of the Scheme’s assets;
- (c) The Trustees have a meaningful basis for the evaluation of the investment performance of the individual investment managers, investment performance of the Scheme as a whole and the success of overall investment strategy through achievement of defined investment objectives; and
- (d) The Trustees fulfil the requirements of the Occupational Pension Schemes (Investment) Regulations 2006 to 2007, which stipulate that such a Statement is put in place.

It is intended that this Statement be sufficiently specific to be meaningful, but adequately flexible as to be practical. The intention is not to outline detailed guidelines for the Scheme’s investment managers – this should be done within the specific legal agreements with those parties – but rather to state the general philosophy, risk appetite and policies of the Trustees that will shape the governance of the Scheme as a whole.

This Statement will be reviewed following any change in investment policy which impacts on the content of the Statement and at least every three years.

Identification of Investment Responsibilities

The sections below outline the roles of sponsor and trustee with regard to investment in order to ensure operational efficiency, accountability and clear lines of communication.

▪ **Company:**

The Company is the Scheme sponsor and contributes to the Scheme, but is generally not responsible for Scheme investments. However, the Trustees recognise that the Company’s continued financial support for the Scheme is of utmost importance in serving the best interests of members and that the Trust Deed stipulates that investment policy must have due regard to the contribution policy set by the Company. Therefore the principles outlined in this Statement are not shaped by the objectives of the Trustees in isolation, but also by an understanding of the objectives (financial or otherwise) of the Company.

▪ **Trustees:**

The Trustees have fiduciary responsibility for Scheme investments. Their specific responsibilities include:

- (a) Identifying the Scheme’s risk tolerance level and formulating an appropriate and efficient investment policy which best serves the interests of the members;

- (b) Delegating the management of Scheme investments to recognised experts. The Trustees recognize that their role is supervisory – not investment advisory;
- (c) Monitoring and evaluating performance results to ensure that all guidelines are being adhered to and objectives are being met;
- (d) Making any necessary changes to the parties chosen to provide services to the Scheme relating to the investment of assets; and
- (e) Regularly reviewing this Statement, which they have discretion to amend or restate at any time to reflect the current investment arrangements of the Scheme (as agreed in accordance with the Trust Deed and Rules).

Other parties with specific duties with regard to investment include the Scheme's consultants, fund managers, custodians and Scheme administrator.

Investment Objectives

The overall investment objective of the Trustees is to maximise the level of investment return at an acceptable level of risk, through adopting a prudent, carefully planned and well-executed investment policy. This will in turn assist in the Trustees' ultimate objective of maximising the security of benefits provided to members.

Risk Measurement Methods

In determining the level of risk appropriate to the Scheme at any point in time, the Trustees recognise the importance of the nature and duration of the liabilities, and measure the risk of the chosen investment policy by reference to these liabilities.

In particular, the Trustees consider the following risks:

- The risk of achieving an insufficient level of investment return relative to the rate required to match the growth in liabilities over time.
 - The required rate will depend on the funding policy adopted for the Scheme. Therefore, the Trustees acknowledge the critical need for interaction and co-operation between the Trustees and the Company when formulating investment policy.
- The risk of excessive volatility in the investment returns of the Scheme relative to the movement in liabilities over shorter-term periods (e.g. one year).
 - The Trustees will consider this volatility in relation to the liabilities measured under the Minimum Funding Standard basis, the Scheme Actuary's ongoing basis and any other relevant measures. The Trustees recognise that the pattern and volatility of the Scheme's investment returns can impact directly on the pattern and volatility of the Company's contribution rates and various accounting items. Therefore, risk will also be considered in these terms where appropriate.

Managing the two risks above *in isolation* may lead to conflicting investment policies. Therefore, in formulating an appropriate investment policy, the Trustees seek to arrive at an acceptable *balance* between these risks in order to best meet their investment objectives. Furthermore, the Trustees will manage a range of other investment risks using the risk management processes outlined in the next section in order to create a prudent, diversified and efficient portfolio.

Risk Management Processes

The Trustees will ensure, either through direct guidance or through ascertaining the suitability of any commingled (unitised) vehicles that are used, that policies and guidelines are in place for the appointed investment manager(s) and other providers such that:

- investments are, for the most part, limited to marketable securities traded on recognised/regulated markets;
- investment in derivative instruments may be made only in so far as they either contribute to a reduction of investment risks or facilitate efficient portfolio management. Any such derivative investment must avoid excessive risk exposure to a single counterparty and to other derivative operations;
- the portfolio is properly diversified in such a way as to avoid excessive reliance on any particular asset, issuer or group of undertakings and so as to avoid accumulations of risk in the portfolio as a whole. Investments in assets issued by the same issuer or by issuers belonging to the same group must not expose the scheme to excessive risk concentration; and
- the security, quality and liquidity of the portfolio as a whole is ensured, with due regard paid to the level of non-Euro currency exposure.

All investment managers are employed by the Trustees and subject to termination at any time.

Current Investment Policy

The current investment strategy of the Trustees is set out below along with a description of the investment manager arrangements adopted.

Strategic Asset Allocation

The Trustees have considered their strategic asset allocation mix and have established a long-term strategic asset allocation of approximately 60% in 'Return-Seeking' assets and 40% in 'Risk-Reducing' assets as suitably reflecting the investment objectives of the Scheme. Having had regard to the nature and duration of the expected future retirement benefits, the Trustees believe that such a strategy prudently positions the Scheme so as to achieve their objectives at the current time.

The table below sets out the strategic asset allocation as currently employed by the Trustees.

Current Strategy	
Asset Class	Central Weighting
Global Equities (100% Hedged)	18.6%
Minimum Volatility Equities	3.0%
Emerging Market Equities	5.4%
Small Cap Equities	3.0%
Total Equity	30.0%
Emerging Market Debt	3.6%
Absolute Returns	12.0%
Absolute Return Bonds	6.0%
IG Euro Corporate Bonds	4.8%
High Yield Bonds	3.6%
Total Non-Equity Growth Assets	30.0%
Total 'Risk-Seeking' Assets	60.0%
Core Eurozone Govt Long-dated Nominal Bonds	5.0%
French & German Inflation Linked Bonds	35.0%
Total 'Risk-Reducing' Assets	40.0%
Total Fund	100.0%

The currency of the Scheme, and thus of the benchmark, is the Euro.

The Trustees recognize that even though the Scheme's investments are subject to short-term volatility, it is critical that a long-term investment focus be maintained. The Trustees intend to avoid ad-hoc revisions to their philosophy and policies in reaction to either speculation or short-term market fluctuations.

Manager Structure

The Trustees appointed Irish Life Investment Managers and Standard Life Investments to manage the Scheme's assets. Both Equity and Bond investments are managed on passive basis.

Performance Objectives

The performance objective of the Scheme's investment with Irish Life Investment Managers is to produce a return in-line with the agreed benchmark. The specified benchmarks for the Scheme funds are outlined in the table below.

Fund	Active or Passive	Benchmark	Performance Objective
Global Equities (Hedged)*	Passive	FTSE World Hedged Euro	Return in-line with benchmark
Emerging Market Equities*	Passive	MSCI Emerging Market	Return in-line with benchmark
Minimum Volatility Equities*	Passive	MSCI World Min Vol (T-1)	Return in-line with benchmark
Small Cap Equities	Passive	MSCI World Small Cap Index	Return in-line with benchmark
Emerging Market Debt*	Passive	JP Morgan GBI-EM	Return in-line with benchmark
Global Absolute Return Strategies Fund (Invesco)	Active	Cash	Target cash (6 mth Euribor) + 5% p.a. (gross of fees) over rolling 3 year basis
Absolute Return Global Bond Strategies Fund (Standard Life)	Active	Cash	Target cash (3 mth Euribor) +3% p.a. (gross of fees) over rolling 3 year basis
IG Euro Corporate Bonds	Passive	ICE BAML 10+ Yr Euro Lg Cap Corp Index	Return in-line with benchmark
High Yield Bonds	Passive	ICE BofA ML BB-B Rated Dev Mkts HY	Return in-line with benchmark
Long-dated Nominal Bonds*	Passive	Merrill Lynch EMU Gov Nominal > 10yrs AAA/AA Index	Return in-line with benchmark
Inflation Linked Bonds*	Passive	Customised Benchmark	Return in-line with benchmark

* Part of Law Society of Ireland's bespoke fund (LSI Balanced).

Performance is evaluated against these objectives by the Trustees on at least an annual basis, with a critical review every three years.

Environmental, Social, and Corporate Governance (ESG) Policy

The Trustees believe that environmental, social, and corporate governance (ESG) factors may have a material impact on investment risk and return outcomes, and that good stewardship can create and preserve value for companies and markets as a whole. The Trustees also recognise that long-term sustainability issues, particularly climate change, present risks and opportunities that increasingly may require explicit consideration.

The Trustees have given their appointed investment managers full discretion in evaluating ESG factors, including climate change considerations, and exercising voting rights and stewardship obligations attached to the investments. The investment managers are expected to act in accordance with their own corporate governance policies and current best practice. As the Plan invests in unit funds, the Trustees engage with their investment managers in relation to ESG matters.

The Trustees consider Mercer's ESG ratings (where available) for each of their strategies. Rating reviews are undertaken on a regular basis and documented at least annually.

Shareholders' Rights Regulations 2020

With respect to the European Union (Shareholders' Rights) Regulations 2020, the Trustee has not developed a standalone engagement policy. The Plan invests in units in various pooled funds that may from time to time invest in equities of companies which are listed on EU regulated markets. However, in each case the Plan is one investor among others so has no direct voting rights or other means of engagement with any companies in which the pooled fund may have invested.

The Trustees have engaged with the schemes Equity manager ILIM who have provided a copy of their Engagement Policy and confirmed that they are in compliance with the Regulations. The investment horizon of the Plan's equity investments is medium to long term in nature, and the Trustees expect the managers to use their engagement activity to drive improved performance over those periods. The Trustees also expect investment manager appointments to be long-term in nature, and assess the performance over longer-term periods. Short term performance issues would not be expected to result in a manager termination, although other factors may necessitate a change over relatively short timeframes.

Sustainable Finance Disclosure Regulations

The Trustees acknowledge that under Article 4 of the Disclosure Regulations there is a requirement to publish and maintain on a website whether principal adverse impacts of investment decisions on sustainability factors are considered. The Trustees are awaiting the clarity of the Level II regulations prior to making such a statement.

This policy may be made publicly available in the future but is currently included within the SIPP of the Plan as this is available to members each year through the Trustee Annual Report.

Effective Date of this Statement: February 2021

Investment Manager's Report

THE LAW SOC OF IRE PENSION & LIFE ASSURANCE SCHEME

Investment Report for Year Ended 31 December 2020

Investment Policy

The long term investment objectives of your pension fund are to achieve a return on fund assets which is sufficient, over the long-term, to meet your funding objectives and to earn a rate of return on assets that will exceed inflation and the risk free rate (cash).

In general, this will require a long-term investment return of at least price inflation plus 4% per annum. Examination of the long term return characteristics of asset types indicates that these objectives are most likely to be achieved by allocating a higher proportion of the fund to risk assets, such as equities and property with lower allocations to monetary assets such as bonds and cash. Each scheme however is unique and as such will have its own unique characteristics that determine the appropriate asset allocations between risk & monetary assets. Risk assets as outlined above whilst providing superior longer term returns, tend to be more volatile when compared with monetary assets which historically have provided lower returns but with less volatility.

Investment Performance

Global equities have generated positive returns over the last twelve months, rising 14.8% in local currency terms and 7.2% in Euro terms. Following a good start to 2020 where equities were supported by accommodative central bank policies and the agreement of a US/China Trade deal, equities suffered a significant correction in the first quarter of 2020 on the back of concerns over the economic fallout from the outbreak of Covid 19 across the globe. The slowing growth backdrop, various political tensions, trade war fears and end-of-cycle concerns all contributed to volatility in equity markets at various points over the last year. However, certainty surrounding the US Presidential Election and positive vaccine news have spurred equity markets in the latter part of 2020.

Eurozone bonds have risen over the last 12 months with the Eurozone 5y+ sovereign bond benchmark up 7.4%. German 10-year yields however fell to new all-time lows in March of -0.91% with the onset of recession following the implementation of restrictions to contain the spread of Covid 19.

Peripheral spreads have been supported by the yield pickup available compared to core bond markets and by the resumption of ECB asset purchases. The agreement in July to include grants within a European Recovery Fund helped to narrow spreads as this involves fiscal transfers from core countries to peripheral regions. This was further bolstered by the ECB decision in December to expand its €1.35tn bond-buying programme by a further €500bn.

Irish commercial property has generated a negative return over the last year. Until the onset of recession this year, the market had been supported by strong activity levels, a modest decline in yields in some sectors of the market and firm rental levels. The property sector has also been supported by an attractive income yield of approx. 4.5%. Recent economic weakness associated with the outbreak of Covid 19 however has given rise to some uncertainty over the outlook for property, particularly in the retail sector and resulted in negative property returns year to date. Commodities fell -23.7% over the last 12 months and -30.0% in Euro terms. Commodity prices have been volatile over the last year and sensitive to expectations regarding the global growth outlook and its impact on the anticipated level of demand for commodities. The oil price has fallen -20.5% over the last year. The overhang of excess supply relative to weaker demand has been a key driver of weakness in the oil price.

PENSION CONSENSUS FUND S3

The Consensus Fund adopts the average asset and country allocation of all the investment managers included in the Pension Pooled Fund Survey. This information is published quarterly, but we monitor the mix continuously. Within each market, the fund tracks the market return by investing in a basket of securities in the same proportion as they are represented in the relevant market index. Efficient trading within each portfolio minimises the transaction costs, adding value which is reflected in the performance. This strategy eliminates the manager selection risk and produces consistent long-term managed fund growth while avoiding violent swings from the top to the bottom of the performance league table.

Market and economic review

2020 ended with an inoculated bang. Despite renewed lockdowns in Europe and rising COVID-19 infections globally, risk assets continued their march upwards amid hopes for reflation, better growth and higher earnings, supported by a backdrop of more fiscal stimulus in the US, a Brexit deal and the beginnings of vaccine rollouts. US indices continued to hit record highs as the virus ripped through the country boosted by Thanksgiving get togethers but President Trump's signature on a massive stimulus bill was enough to stoke markets. Europe and the UK finally agreed terms for the post-Brexit trade deal. The jury is still out on its content but the cliff-edge no deal scenario was averted just before Christmas.

A drifted dollar and an optimistic outlook also saw emerging market assets cap a good year with some healthy gains. Central banks continued to shower markets with stimulus gifts over the festive period, which provided further confidence to investors looking at riskier assets.

Account performance

The account returned -0.02% in December compared to 3-month EURIBOR, which returned -0.05%. Broadly rising markets meant our European and US credit ideas, as well as our selective emerging markets government debt exposure, were supportive. Our Japanese and Taiwanese equity ideas were also positive. Falling inflation expectations in the UK also boosted performance. Our yen exposure worked well against the weakening US dollar. On the downside, one of the main detractors was our 'Currency - Russian Ruble vs Chilean Peso'. Here, the rally in copper prices pushed the peso higher relative to the ruble, working against our idea.

Fund strategy

The main change in December was a new 'Interest Rates - UK vs Germany' idea. The UK has been the hardest hit economy in Europe by COVID-19 and may struggle to recover swiftly despite a successful start to the vaccine rollout program. We do not believe the European Central Bank (ECB) will cut interest rates any lower than the current level, as they didn't cut at all through 2020. At the same time, the Bank of England (BoE) has been sounding very dovish in recent statements, explicitly stating they have more tools available and are open to the possibility of negative interest rates in the future. We believe German rates are largely anchored by the ECB and we believe UK rates have the potential to fall. To implement this idea we are long UK ten-year bonds and short German two-year bonds. Also in the UK, we added some upside exposure to UK equities in our 'Equity - Equity Optionality' idea. We also changed the implementation of our US credit idea and now hold a factor-based US investment grade credit strategy, which provides us a more selective and defensive exposure to the US investment grade credit market.

Independent risk breakdown by idea

Idea	Independent risk ²	% of total independent risk
Commodity - Commodity Carry	0.82	3.78

Investment risks

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns.

Changes in interest rates will result in fluctuations in the value of the fund.

The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund.

The fund may hold debt instruments which are of lower credit quality and may result in large fluctuations of the value of the fund. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date.

The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund.

Investment in instruments providing exposure to commodities is generally considered to be high risk which may result in large fluctuations in the value of the fund.

The effects of inflation may result in a reduction in the value of your investment.

The fund may invest in distressed securities which carry a significant risk of capital loss.

As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the fund.

Important information

All data is as at 31 December 2020 sourced from Invesco unless otherwise stated.

1. Expected fund risk - the expected volatility of the fund as measured by the standard deviation of the current portfolio of ideas over the last three and a half years.
2. Independent risk - the expected volatility of an individual idea as measured by its standard deviation over the last three and a half years.

Account performance: Daily time weighted methodology. The figures are shown in sterling on a total return basis. The since inception figures show the cumulative and annualised performance since the date of appointment.

Benchmark: The reference benchmark is UK 3-month EURIBOR. Benchmark source: Bloomberg. Target: UK 3-month EURIBOR +5%.

Objective: The fund aims to achieve a positive total return in all market conditions over a rolling 3 year period. The fund targets a gross return of 5% p.a. above 3 month EURIBOR (or an equivalent reference rate) and aims to achieve this with less than half the volatility of global equities, over the same rolling 3 year period. There is no guarantee that the fund will achieve a positive return or its volatility target.

Telephone calls may be recorded.

Please refer to the most up to date relevant fund and share class-specific Key Investor Information Document for more information on our funds. Further information on our products is available using the contact details shown.

The distribution and the offering of the fund or its share classes in certain jurisdictions may be restricted by law. Persons into whose possession this document may come are required to inform themselves about and to comply with any relevant restrictions. This does not constitute an offer or solicitation by anyone in any jurisdiction in which such an offer is not authorised or to any person to whom it is unlawful to make such an offer or solicitation.

Persons interested in acquiring the fund should inform themselves as to (i) the legal requirements in the countries of their nationality, residence, ordinary residence or domicile; (ii) any foreign exchange controls and (iii) any relevant tax consequences.

The fund is available only in jurisdictions where its promotion and sale is permitted.

For the purposes of UK law, the fund is a recognised scheme under section 264 of the Financial Services & Markets Act 2000. The protections provided by the UK regulatory system, for the protection of Retail Clients, do not apply to offshore investments.

This document is for the sole use of The Law Society of Ireland Pension and Life Assurance Scheme and must not be distributed to any other party.

Risk Factors of Investing

At New Ireland we classify our wide range of funds into seven different risk categories to help you better understand the risks to your original investment. Investing should always be considered over the medium to long-term (at least 7 years) so as to reduce the risk of short-term volatility. However, even long-term investing involves risk as values will fluctuate over time. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. Separately European Union (EU) law also requires that a risk indicator be applied to a fund if certain products are held (excludes pensions), and it may differ from the New Ireland risk category. The EU indicator is stated in the Fund Information Sheet and can be found at <http://fundcentre.newireland.ie/#KIDS>.

For more information on our funds:

Talk to your Financial Broker or Advisor

Warning: Past performance is not a reliable guide to future performance.

Warning: The value of your investment may go down as well as up.

Warning: If you invest in this fund you may lose some or all of the money you invest.

While we believe the information set out is reliable, we cannot guarantee its accuracy. Mention of specific assets does not constitute an offer or recommendation to invest in those assets. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie/fundcentre for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. If we refer to a fund as closed, this means the fund is closed to new investment. For some funds that invest in shares or bonds, the assets in that fund may be used for the purpose of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within a fund it provides an opportunity to increase the investment return. New Ireland Assurance Company plc is regulated by the Central Bank of Ireland. A member of Bank of Ireland Group. The Company may hold units in the fund mentioned on its own account. This fund fact sheet was generated on the 08 May 2020.

Fund Description:

IRIS is aimed primarily at individuals who at retirement intend to take a retirement lump sum and invest in an Approved Retirement Fund with the balance of the fund. To achieve this objective there is a gradual switch from a higher risk investment strategy to a low to medium risk investment strategy in the period running up to retirement. If you intend to purchase an annuity at retirement, or take your proceeds as a taxable lump sum, we have other investment strategies which may better meet your needs.

Managed By: State Street Global Advisors (SSGA) and Legal and General Investment Management (LGIM)

Style: Actively managed

Asset Mix: SSGA equity, fixed income, property and cash strategies and the LGIM Diversified Fund which is a diversified multi-asset fund.

Warning: Past performance is not a reliable guide to future performance.

Warning: The value of your investment may go down as well as up.

Warning: This fund may be affected by changes in currency exchange rates.

Warning: If you invest in this fund you may lose some or all of the money you invest.

While we believe the information set out is reliable, we cannot guarantee its accuracy. Mention of specific assets does not constitute an offer or recommendation to invest in those assets. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie/fundcentre for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. If we refer to a fund as closed, this means the fund is closed to new investment. For some funds that invest in shares or bonds, the assets in that fund may be used for the purpose of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within a fund it provides an opportunity to increase the investment return. New Ireland Assurance Company plc is regulated by the Central Bank of Ireland. A member of Bank of Ireland Group. The Company may hold units in the fund mentioned on its own account. This fund fact sheet was generated on the 08 May 2020.

Fund Description:

Passive IRIS is aimed primarily at individuals who at retirement intend to take a retirement lump sum and invest in an Approved Retirement Fund with the balance of the fund. To achieve this objective there is a gradual switch from a higher risk investment strategy to a low to medium risk strategy in the period running up to retirement. If you intend to purchase an annuity at retirement, or take your proceeds as a taxable lump sum, we have other investment strategies which may better meet your needs.

Risk Factors of Investing

At New Ireland we classify our wide range of funds into seven different risk categories to help you better understand the risks to your original investment. Investing should always be considered over the medium to long-term (at least 7 years) so as to reduce the risk of short-term volatility. However, even long-term investing involves risk as values will fluctuate over time. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. Separately European Union (EU) law also requires that a risk indicator be applied to a fund if certain products are held (excludes pensions), and it may differ from the New Ireland risk category. The EU indicator is stated in the Fund Information Sheet and can be found at <http://fundcentre.newireland.ie/#KIDS>.

Fund Description:

This predominantly passively managed fund, previously known as the Pension Consensus Fund, aims to generate long term returns through exposure to a range of asset classes. Current asset class exposure is c.70% equities, 15% bonds, 10% alternatives & 5% cash with equity exposure to developed & emerging markets. Alternatives may include actively managed commodities, infrastructure & listed property. The fund will aim to remove c. 75% of the effect of currency movements on equity exposure to developed markets

Fund Commentary - Paul Clancy, Investment Writer, State Street Global Advisors March 2020

The MSCI World Index slumped -13.1% as Covid-19's impact was felt globally. European markets lagged: Germany's Dax (-16.4%), Italy's FTSE MIB (-22.4%) and Spain's IBEX (-22.1%) reflected the economic shutdown. Despite the Fed cutting rates to near-zero, the US S&P 500 lost -12.4%, while China's Shanghai Composite lost 'only' -4.5% as it began to relax lockdown measures. The UK FTSE 100 lost -13.4%, while Ireland's ISEQ was off -18.7%. Government bonds were mixed: German 10y yields fell by 14bps to -0.47%. But Italy 10y yields rose from 1.1% to 1.52% and Irish 10y yields rose to 0.07% from -0.16%.

This fund fact sheet was generated on the 08 May 2020.

Fund Description:

This fund invests in the SSGA GRU Euro Index Equity Fund and the SSGA GRU World Ex Euro Index Equity Fund (the SSGA funds) that aim to track as closely as reasonably possible the performance of the FTSE Developed Eurozone Index and the FTSE Developed ex Eurozone Index respectively. The fund aims to split exposure evenly between the two SSGA funds but exposure levels can vary from time to time.

Warning: If you invest in this fund you may lose some or all of the money you invest.

While we believe the information set out is reliable, we cannot guarantee its accuracy. Mention of specific assets does not constitute an offer or recommendation to invest in those assets. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie/fundcentre for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. If we refer to a fund as closed, this means the fund is closed to new investment. For some funds that invest in shares or bonds, the assets in that fund may be used for the purpose of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within a fund it provides an opportunity to increase the investment return. New Ireland Assurance Company plc is regulated by the Central Bank of Ireland. A member of Bank of Ireland Group. The Company may hold units in the fund mentioned on its own account. This fund fact sheet was generated on the 08 May 2020.

Fund Description:

Passive IRIS is aimed primarily at individuals who at retirement intend to take a retirement lump sum and invest in an Approved Retirement Fund with the balance of the fund. To achieve this objective there is a gradual switch from a higher risk investment strategy to a low to medium risk strategy in the period running up to retirement. If you intend to purchase an annuity at retirement, or take your proceeds as a taxable lump sum, we have other investment strategies which may better meet your needs.

Risk Factors of Investing

At New Ireland we classify our wide range of funds into seven different risk categories to help you better understand the risks to your original investment. Investing should always be considered over the medium to long-term (at least 7 years) so as to reduce the risk of short-term volatility. However, even long-term investing involves risk as values will fluctuate over time. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. Separately European Union (EU) law also requires that a risk indicator be applied to a fund if certain products are held (excludes pensions), and it may differ from the New Ireland risk category. The EU indicator is stated in the Fund Information Sheet and can be found at <http://fundcentre.newireland.ie/#KIDS>.

Risk Factors of Investing

At New Ireland we classify our wide range of funds into seven different risk categories to help you better understand the risks to your original investment. Investing should always be considered over the medium to long-term (at least 7 years) so as to reduce the risk of short-term volatility. However, even long-term investing involves risk as values will fluctuate over time. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. Separately European Union (EU) law also requires that a risk indicator be applied to a fund if certain products are held (excludes pensions), and it may differ from the New Ireland risk category. The EU indicator is stated in the Fund Information Sheet and can be found at <http://fundcentre.newireland.ie/#KIDS>.

Warning: Past performance is not a reliable guide to future performance.

Warning: The value of your investment may go down as well as up.

Warning: This fund may be affected by changes in currency exchange rates.

Warning: If you invest in this fund you may lose some or all of the money you invest.

While we believe the information set out is reliable, we cannot guarantee its accuracy. Mention of specific assets does not constitute an offer or recommendation to invest in those assets. Please talk to your financial broker or advisor and refer to the fund information available on our website www.newireland.ie/fundcentre for the key features of the fund, charges, risks associated with investing and for a description of the stated risk profile. If we refer to a fund as closed, this means the fund is closed to new investment. For some funds that invest in shares or bonds, the assets in that fund may be used for the purpose of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within a fund it provides an opportunity to increase the investment return. New Ireland Assurance Company plc is regulated by the Central Bank of Ireland. A member of Bank of Ireland Group. The Company may hold units in the fund mentioned on its own account. This fund fact sheet was generated on the 08 May 2020.

Fund Description:

This fund invests in the SSGA EUR Liquidity Fund, deposits, money-market instruments, short dated government bonds and other cash-like instruments. The fund aims to generate a return in line with short-term deposit rates before charges are deducted.

Managed By: State Street Global Advisors Limited

Style: Actively managed

Asset Mix: Primarily cash deposits, high quality floating rate notes and short-dated investments

Risk Profile:

Very Low Risk

Fund Description:

Passive IRIS is aimed primarily at individuals who at retirement intend to take a retirement lump sum and invest in an Approved Retirement Fund with the balance of the fund. To achieve this objective there is a gradual switch from a higher risk investment strategy to a low to medium risk strategy in the period running up to retirement. If you intend to purchase an annuity at retirement, or take your proceeds as a taxable lump sum, we have other investment strategies which may better meet your needs.

This fund fact sheet was generated on the 08 May 2020.

Terms and conditions apply. Revenue limits apply. Benefits at retirement may be subject to tax.

This report contains information on funds and other matters which have been selected for inclusion in the report by you or your Trustees. This report may contain information which has not been provided or compiled by New Ireland Assurance Company plc and it is important to understand that New Ireland Assurance Company plc assumes no responsibility for the contents of this report. The report is not intended to be a comprehensive guide to all funds, products or markets in which you may be invested. The contents of the report is for information purposes only and does not constitute an offer or recommendation to invest in any funds mentioned, buy or sell any investment or to subscribe to any investment management or advisory service without consulting with a financial advisor. While the information has been taken from sources believed to be reliable, the accuracy or completeness of the information is not guaranteed and any such information may be incomplete or condensed. Any opinions and estimates included in the report constitute best judgment as at the dates stated and are subject to change without notice. Mention of any specific stocks/shares, asset types, geographic regions or investment type is not a recommendation to trade in them. Details of any funds included or information on the composition of the funds are as at the dates stated and may change over time. If there is any conflict between the information in this report and the policy conditions which govern existing products in which you have invested, the policy conditions attaching to your investment products will apply.

Investing involves some degree of risk. The level of risk associated with each fund may differ. It is important to understand that, unless otherwise stated, the value of your investment in any of the funds mentioned may go down as well as up. For some funds that invest in shares or bonds, the assets in that fund may be used for the purpose of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within a fund it provides an opportunity to increase the investment return. Investing in a geared fund or a fund that contains an element of gearing can lead to potentially increased returns when asset growth is positive, however it should be noted that any losses are magnified. In the event that the investment does not perform as intended an investor may not receive back all of their original capital and in extreme circumstances may lose their entire capital. New Ireland's unit linked funds are managed by a range of fund managers. The fund manager varies by fund. Details of the fund manager will appear on any fund information sheets which have been selected for inclusion in this report.

New Ireland Assurance Company plc is regulated by the Central Bank of Ireland. A member of Bank of Ireland Group. The Company may hold units in the funds mentioned on its own account.

**The Law Society of Ireland Pension and Life Assurance Scheme
Year ended 31 December 2019**

Pensions Authority reference number PB 3399

Actuary's Statement

The last Actuarial Funding Certificate was prepared with an effective date of 31 December 2018. This certificate confirmed that the Plan satisfied the Funding Standard set out in Section 44 of the Pensions Act, 1990 at that effective date. The last Funding Standard Reserve Certificate, prepared on the same effective date, confirmed that the Plan held sufficient additional assets to satisfy the Funding Standard Reserve also set out in Section 44 of the Pensions Act, 1990 at that effective date.

I have completed a review of the financial condition of the Plan as at 31 December 2020. Based on that review, I am reasonably satisfied that the Plan continued to meet the Funding Standard and the Funding Standard Reserve at that effective date.

Cathal Fleming
Scheme Actuary Certificate Number P109
Fellow of the Society of Actuaries in Ireland

SCHEDULE BD

Article 4

ACTUARIAL FUNDING CERTIFICATE

THIS CERTIFICATE HAS BEEN PREPARED UNDER THE PROVISIONS OF SECTION 42(1) OF THE PENSIONS ACT 1990 (the ACT) FOR SUBMISSION TO THE PENSIONS AUTHORITY BY THE TRUSTEES OF THE SCHEME

SCHEME NAME: The Law Society of Ireland Pension and Life Assurance Scheme

SCHEME COMMENCEMENT DATE: 01/01/1991

SCHEME REFERENCE NO.: PB3399

EFFECTIVE DATE: 31/12/2018

EFFECTIVE DATE OF PREVIOUS CERTIFICATE (IF ANY): 31/12/2015

On the basis of information supplied to me, having complied with any guidance prescribed under section 42(4)(b) of the Act and, subject thereto, having regard to such financial and other assumptions as I consider to be appropriate, I am of the opinion that at the effective date of this certificate:-

(1) the resources of the scheme, which are calculated for the purposes of section 44(1) of the Act to be €38,936,000.00, would have been sufficient if the scheme had been wound up at that date to provide for the liabilities of the scheme determined in accordance with section 44(1) of the Act which, including the estimated expenses of administering the winding up of the scheme, amount to €32,554,000.00, and

(2) €0.00 of the resources of the scheme referred to in paragraph (1) comprise contingent assets, in accordance with and within the meaning of the guidance issued by the Authority and prescribed under section 47 of the Act.

I, therefore, certify that as at the effective date of this certificate the scheme satisfies the funding standard provided for in section 44(1) of the Act.

I further certify that I am qualified for appointment as actuary to the scheme for the purposes of section 51 of the Act.

Signature: Cathal Fleming **Date:** 30/09/2019

Name: Mr. Cathal Fleming **Qualification:** FSAI

Name of Actuary's Employer/Firm: Mercer (Ireland) Limited **Scheme Actuary Certificate No.:** P109

Article 4

FUNDING STANDARD RESERVE CERTIFICATE

THIS CERTIFICATE HAS BEEN PREPARED PURSUANT TO SECTION 42(1A) OF THE PENSIONS ACT 1990 (the ACT) FOR SUBMISSION TO THE PENSIONS AUTHORITY BY THE TRUSTEES OF THE SCHEME

SCHEME NAME: The Law Society of Ireland Pension and Life Assurance Scheme

SCHEME COMMENCEMENT DATE: 01/01/1991

SCHEME REFERENCE NO.: PB3399

EFFECTIVE DATE: 31/12/2018

EFFECTIVE DATE OF PREVIOUS CERTIFICATE (IF ANY): 31/12/2015

On the basis of information supplied to me, having complied with any guidance prescribed under section 42(4)(b) of the Act and, subject thereto, having regard to such financial and other assumptions as I consider to be appropriate, I am of the opinion that at the effective date of this certificate:-

(1) the funding standard liabilities (as defined in the Act) of the scheme amount to €30,042,000.00,

(2) the resources of the scheme (other than resources which relate to contributions or a transfer of rights to the extent that the benefits provided are directly related to the value of those contributions or amount transferred (DC resources)), calculated for the purposes of section 44(1) of the Act amount to €36,424,000.00,

(3) €15,225,000.00, of the amount referred to in paragraph (2) (subject to a maximum of an amount equal to the funding standard liabilities) is invested in securities issued under section 54(1) of the Finance Act 1970 (and known as bonds), securities issued under the laws of a Member State (other than the State) that correspond to securities issued under section 54(1) of the Finance Act 1970, cash deposits with one or more credit institutions and such other assets (if any) as are prescribed under section 44(2)(a)(iv) of the Act,

(4) the amount provided for in section 44(2)(a) of the Act (Applicable Percentage x ((1) minus (3))) is €1,482,000.00,

(5) the amount provided for in section 44(2)(b) of the Act, being the amount by which the funding standard liabilities of the scheme would increase if the interest rate or interest rates assumed for the purposes of determining the funding standard liabilities were one half of one per cent less than the interest rate or interest rates (as appropriate) assumed for the purposes of determining the funding standard liabilities less the amount by which the resources of the scheme (other than DC resources) would increase as a result of the same change in interest rate or interest rates is €217,000.00,

(6) the aggregate of (4) and (5) above amounts to €1,699,000.00, and

(7) the additional resources (as defined in the Act) of the scheme amount to €6,382,000.00, of which, in accordance with and within the meaning of the guidance issued by the Authority and prescribed under section 47 of the Act, €0.00 comprises contingent assets and €0.00 of such contingent assets comprise an unsecured undertaking.

I therefore certify that as at the effective date of the funding standard reserve certificate, the scheme does hold sufficient additional resources to satisfy the funding standard reserve as provided in section 44(2) of the Act.

I further certify that I am qualified for appointment as actuary to the scheme for the purposes of section 51 of the Act.

The Law Society of Ireland Pension and Life Assurance Scheme (“the Scheme”) – PB 3399

Report on Actuarial Liabilities

Under Section 56 of the Pensions Act, 1990, and associated regulations, the Trustees of defined benefit pension schemes are required to have a valuation¹ of the scheme prepared on a triennial basis. The most recent formal actuarial valuation of the Scheme was carried out as at 31 December 2018. A copy of the report is available to Scheme members on request.

One of the purposes of the valuation is to set out the Scheme’s ongoing funding level. It does this by comparing the value of the Scheme’s accumulated assets with the value of its accrued liability. The assets and liabilities emerging from the last valuation were as follows:

	€000s
Value of Accumulated Assets	36,856
Value of Accrued Liability	37,811
Surplus / (Deficit)	(955)
Funding Level	97%

Valuation Method & Assumptions

The value of the accrued liability was calculated by firstly projecting the accrued benefits payable in the future, making assumptions in relation to financial matters such as salary and pension increase rates and demographic matters such as mortality rates. The resultant projected benefit cashflows were then discounted to the valuation date to arrive at a single capitalised value.

A summary of the most significant actuarial assumptions used to determine the accrued liability is set out below (full details are provided in the Scheme’s actuarial funding report):

Financial assumptions	
<i>Discount Rate</i>	
Pre-retirement	3.75%
Post retirement	1.75%
<i>Benefit Increases</i>	
Price inflation	1.50%
Salary Increases	2.00%
Pension increases	0.90%

Demographic assumptions		
Post retirement mortality table	S2PMA / S2PFA CMI 2016 [1.5%]	
Future life expectancies	Male	Female
Current retiree aged 65	22.2	24.2
Future retiree at age 65 currently aged 45	23.8	25.8
A complete description of all other demographic assumptions can be found in the formal actuarial funding valuation report.		

The next valuation is due to be completed with an effective date not later than 31 December 2021.

¹It should be borne in mind that a valuation is only a snapshot of a scheme's estimated financial condition at a particular point in time; it does not provide any guarantee of future financial soundness of a scheme. Over time, a scheme's total cost will depend on a number of factors, including the amount of benefits paid and the return earned on any assets invested to pay benefits.
